

TegoNuke(tm) Mailer 1.1.0

2010-12-26 10:52:33 by codewarrior

The new TegoNuke(tm) Mailer is finally here after a long wait. It sports PHP 5.2+ only, revamped Swift Mailer and administration module, many new exciting features and loads of on-line documentation. For a more detailed explanation of the TegoNuke(tm) Mailer and a more detailed list of features, check out the [TegoNuke\(tm\) Mailer Wiki](#) page.

While the Mailer was developed on [RavenNuke\(tm\)](#) for RavenNuke(tm) and PHP-Nuke, it may be possible to use on other *nuke variants with slight variations. Come get the [latest download](#).
