

alteredDark Theme Released

2012-09-10 20:35:40 by nextgen

I have released a dark Ravennuke theme today for the Ravennuke 2.5 CMS only. It is a fast loading, tableless theme with a matching forum template. Is W3C compliant and also comes with all PSD's needed to customize the theme. You can download matching avatars and emoticons in the downloads for this nice dark theme as well. Visit <http://www.alterednuke.com> to grab your theme today.
